

CONTRACT EDITION

we are

CONTRACT EDITION

CONTRACT EDITION

Contract Edition has been producing textiles since 1979. We design and manufacture high-quality upholstery, window coverings and exclusive accessories as well as other textile-related products for the home and public interiors.

1-2

our purpose

We believe in creativity.

Contract Edition is a forward-looking textile company. We continuously seek to push the aesthetic and functional boundaries of textile design.

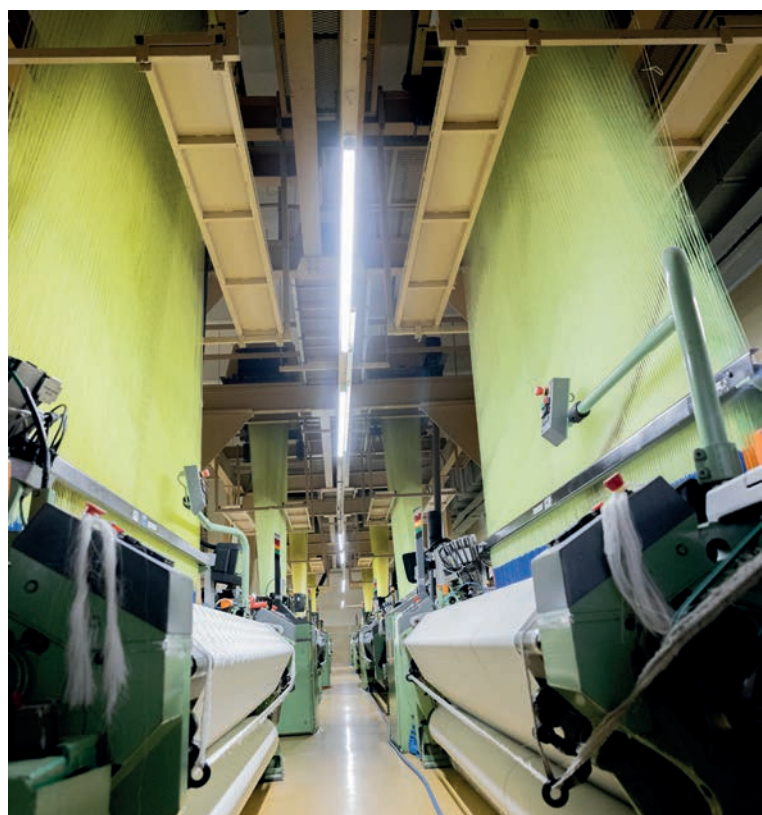

3-4

our production

The production process is fully vertical, starting from yarn dyeing and preparation, weaving, piece dyeing, finishing, pleating and printing (digital and screen) to readymade products (pillows, bed runners, curtains, bedding) for hospitality and commercial projects.

our product

We offer the suitable products for every kind of project: flame-retardant fabrics and sheers as well as furnishing and upholstery fabrics in differing designs.

- Contract fabrics for guest rooms in hotels or aboard ships, in lobbies, theatres, casinos or restaurants.

- Special antimicrobial treatments oil and stain repellents.

- High-performance finishes and intelligent textiles to promote a sense of well- being and aid recovery in exacting healthcare environ-

5-6

Our collections include upholstery, drapery, curtains and print fabrics in narrow and wide width.

We offer a wide variety of furnishing fabrics: woven and printed furnishing fabrics, transparent, opaque or darkening curtains. Velvets, either plain or structured, sumptuous jacquards or flowing satins are particularly suited as decorative drapes. In addition to the comprehensive colour range, almost any colour is available as a special colour.

7-8

CONTRACT EDITION

Trevira CS Club

Gold Member

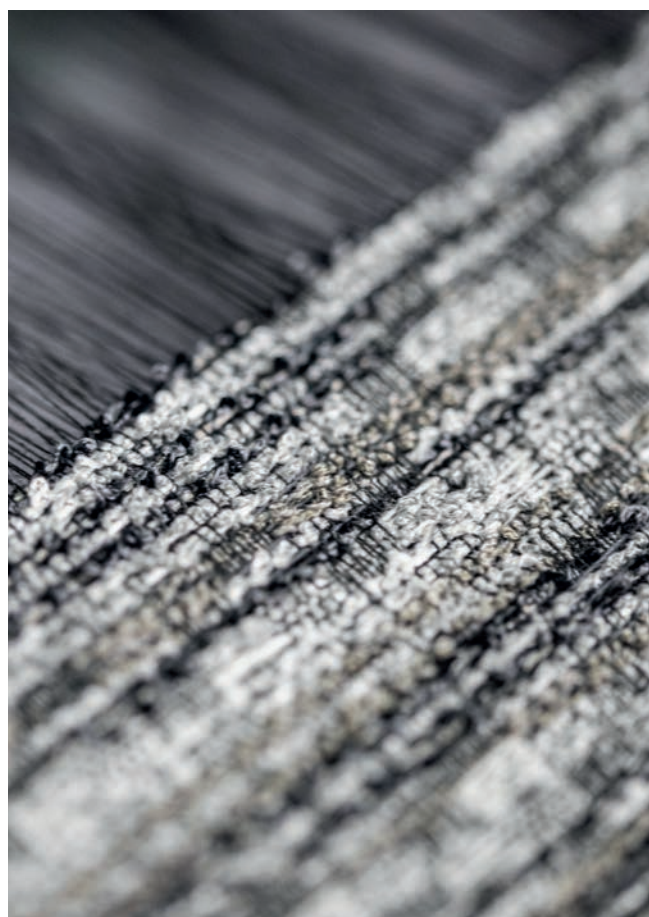

According to the relevant norms all textiles delivered by Vanelli are permanently flame retardant. For all furnishing and upholstery fabrics Contract Edition uses high quality Trevira CS yarns.

Contract Edition has been a gold member of the Trevira CS club since its formation.

We proudly present a collection created with high quality FR Polyester yarns made from post-consumer and post-industrial recycled PET products such as bottles packaging and

We develop designs and concepts for the needs of our customers and provide a reliable and quick sampling service.

As a result of the in-house vertical production capabilities, Vanelli is flexible in terms of custom colours as well as specially tailored textures and designs.

11-12

pure air[©]

Pure AIR[©] technology is based on mineral salts that are activated in daylight conditions. This technology consists of a mineral based, photo catalyst finishing that is applied to the textile. It permanently reduces pollutants and malodours in the air of your living, sleeping and working surroundings by up to 100 percent. The Pure AIR[©] finish does not wear off from textiles.

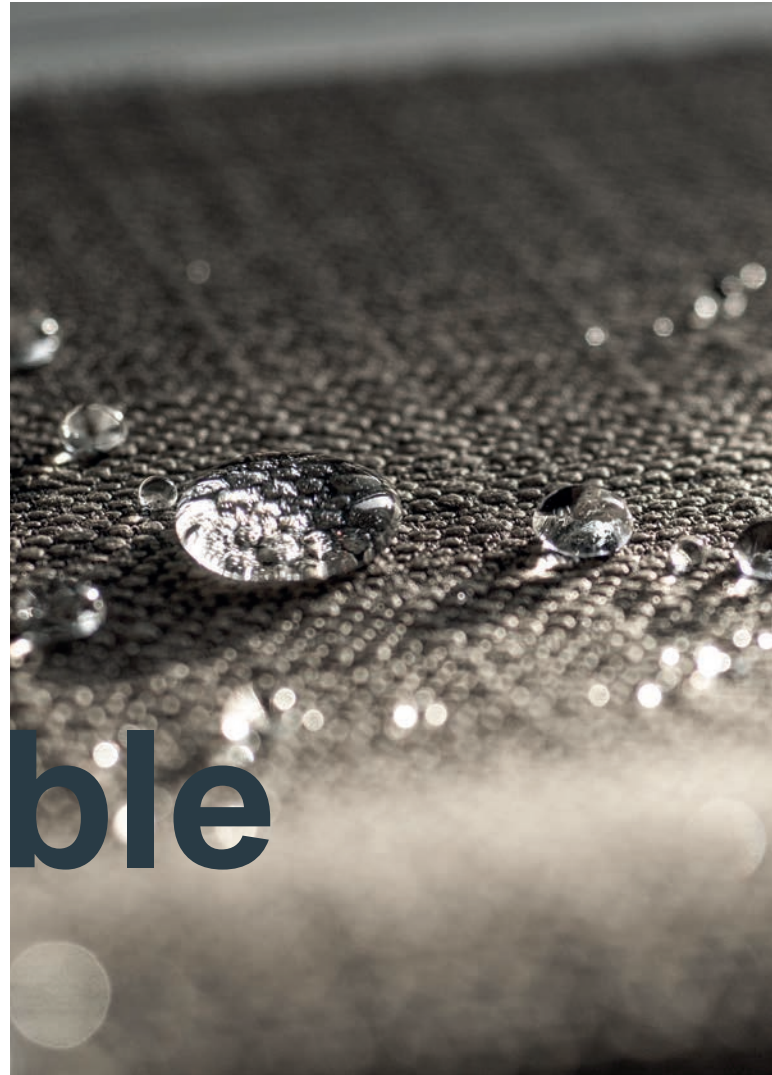

well-being

It is known, that there exist weak-energy negative ions and positive ions in our surroundings. These ions are not linked to strong static electricity. Electronic appliances such as computers, fluorescent lamps, air conditioners, modern house materials generate weak-energy positive ions. These harmful ions make feel us tired, depressed and irritable. The well-being treatment activates the beneficial negative ions through neutralising and removing harmful positive ions. The negative well-being ions have an impact through breathing and skin contact. The treatment is beneficial in cell activation, in the ability to neutralize the oxidized substances which damage healthy cells, in improving blood purification, and adjusting autonomic nerves. The special well-being finish decreases stress and improves sleep.

13-14

self cleanable

This easy-care stain-repellent finish contributes to easy maintenance. Bacteria, dirt and moisture don't stand a chance with this innovative system. Stains caused by intensive use or the remains of food can easily be removed from the fabrics, even many days afterwards. This easy-care finish is recommended in hotel and restaurant environments, where textiles contribute to a relaxing atmosphere by reducing noise and spreading warmth and comfort.

fabrics for cruise ships

Contract Edition offers a wide range of IMO certified fabrics designed and tested for the cruise ship industry. Fabrics inherently pass IMO flame code requirements for the cruise ship industry also safety plays an important part therefore the decorative and upholstery fabrics must pass special flame-retardancy tests specially developed for shipping. Our IMO fabrics are used in cruise liners, cargo ships, ferries and pleasure boats. Our IMO curtains and IMO sheers meet the major International standards applicable to textiles for use in the interior designs, are washable and do not lose their properties with washing. We have a wide selection of IMO flame retardant fabrics for the contract sector.

IMO: - Module B. Fire protection requirements of Marine Equipment Directive (MED) 96/98/CE. IMO Res. MSC.307(88)- (FTP Code 2010) Part 7 Part 8.

15-16

dimout fabrics

Contract Edition offers a wide selection of DIMOUT-fabrics in a range of designs and textures. Our DIMOUT-fabrics effectively block the light from entering the room. The fabrics meet the highest requirements regarding fire resistance, applicability, colour and light fastness, durability and wear resistance. Vanelli DIMOUT-fabrics feature an elegant drape with a black-out performance of up to 99%.

acoustic fabrics

Contract Edition offers a wide range of acoustic fabrics—for a harmonious balance of acoustics and aesthetics. As with light, when sounds hits a surface, part of its energy is absorbed and part is reflected back into the room. So, just as we may install a blind in front of a window to control its brightness, similarly, acoustic solutions are necessary to effectively manage sound and the effect it has upon noise and echo within an interior as it bounces off hard, reflective surfaces. The test report lists the Noise Reduction Coefficient (NRC), which is typically between a range of “1” and “0”. If the material achieves a “1”, it is said to have 100% absorption (like an open window). If the material receives a “0”, it is said to be perfectly reflective. If a fabric has an NRC rating of .65, it means that 65% of the sound energy that contacts the fabric is absorbed, rather than reflected.

ACOUSTIC: - ISO/EN 354, ISO 11654
ad DIN EN 29053 standards and impress
with an unheard-of quality in any sound
range.

our design team

19-20

The Contract Edition in-house design team follows the latest trends and innovations while developing new qualities and collections. Our research and development processes prioritize sustainable choices while sourcing for the latest yarn releases and textile finishes.

21-22

our certifications

Many Contract Edition textiles have been issued with internationally recognised certifications that demonstrate their quality and environmental credentials. Vanelli products are woven and treated with ecological standards.

All our products are certificated with OEKO-TEX. Here is a brief overview of the certifications, awards and standards.

In house quality and technical departments guarantee the highest standards in design, durability and quality for our contract fabrics. We provide technical data and certificates such as M1, B1 and Classe 1 for our Trevira fabrics and Modul B and D for IMO.

OEKO-TEX®
CERTIFIED BY TESTEX
STANDARD 100

23-24

our commitment to sustainability

Fully aware of the responsibility that comes from being a pioneer in our sector. We at Contract Edition have made our sustainability approach one of the main factors that determines our business strategy. We have high standards for ourselves, which means we are always innovating, discovering new ways to make our impact valuable and as truly sustainable as possible.

our GRS standard

We at Contract Edition are fully committed to traceability of the fibers and materials used in our products. The GRS is a certification that verifies recycled input material, tracks it from input to the final product, and also ensures responsible social, environmental practices and chemical use through production. The goal is transparency in the supply chain, and providing better information to consumers.

We find it our responsibility to contribute to the development of the society by voluntarily participating in social and community initiatives.

25-26

27-28

our care and maintenance

Produced to the highest environmental standards. Our collections are premium quality, easy to maintain and hardwearing. They come in wide choice of styles and constructions.

Textiles used for interiors need regular cleaning. Dust and dirt wear down the textiles and their added properties.

our references

Contract Edition play an important part in hospitality. Our extensive fabrics continuously meets the needs of designers and architects.

All of our products reflect a passion for the art of home textile and combine the latest trends with the most beautiful materials. We offer a wide range of products, cushions, table linens, bed covers, throws, curtains, and all home textiles and exports % 70.

34-35

Our philosophy is as a vertical fabric producer combine all different yarn and weaving and printing sewing techniques together. As an exclusive fabric producer to keep that variety and combinations all together in house.

CONTRACT EDITION

outdoor fabrics

Fine and elegant solutions for home decoration. They are a light-weight fabrics suitable for both internal and external spaces.

They may be used as a door or side curtain for outdoor structures such as pergolas and gazebos; for embellishing leisure spaces with puffs, false ceilings and draperies; or as vertical curtains for windows and balconies with the aim of increasing visual comfort and privacy.

Sheer and Etamine are resistant to mould and salt-water, and keep their good looks without needing complex maintenance or frequent washing. They remains colourful and attractive, without fading or changing colour even when exposed to the harmful UV rays from sunlight, and resists most air-borne pollutants that would damage most other kinds of fabric in a short time.

The Teflon treatment make them water and oil repellent, allowing water to slide off, dragging the dirt with it. The water repellence together with the fabric construction helps fast drying and keeps it light and airy.

Designed for garden terrace and pool, combines the resistance and performance of solution dyed fabric with style and colour, with a collection offering more than 400 patterns featuring elegance and originality.

Thanks to the innovative finishing Teflon our fabrics are water/oil repellent, resistant to mould, stains, salt and U.V. fading, even though they are soft and pleasant to touch like natural-fibre fabrics.

Tempotest Home is guaranteed 6 years against loss of colour and tenacity due to normal weather conditions.
